Bengaluru, Karnataka, India | +91-6900186472 | thekunal0010@gmail.com | [linkedin.com/in/thekunal0010](https://www.linkedin.com/in/thekunal0010) | github.com/thekunal0010

SUMMARY

MCA candidate (2027) with hands-on experience building full-stack web applications and machine learning solutions using React, Next.js, Node.js, Python, Flask, and SQL/NoSQL databases. Experienced in designing REST APIs, implementing authentication and role-based access, integrating databases, and preprocessing data for ML workflows — with a track record of shipping complete, working applications rather than isolated exercises.

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript, TypeScript, HTML, CSS
Frontend:	React.js, Next.js, Vite, Tailwind CSS
Backend:	Node.js, Express.js, Flask, Prisma ORM, REST APIs
Databases:	MongoDB, PostgreSQL, MySQL, SQLite, Oracle
Machine Learning / Data:	Pandas, NumPy, Scikit-learn, Matplotlib, Data Preprocessing, Feature Engineering, Classification, Regression, Clustering, Model Evaluation
Cloud & Tools:	Git, GitHub, VS Code, AWS, Vercel, Jupyter Notebook

PROJECTS

Real Estate Management System | *Next.js 16, React 19, TypeScript, Prisma, SQLite, JWT*

- Developed a full-stack real estate platform with role-based access for Customer and Lister users, built with Next.js 16, React 19, and TypeScript.
- Implemented listing management for listers (create, update, delete, image upload) and browsing/search for customers, with filters by city, property type, price range, bedrooms, and lister, plus a favorites feature.
- Engineered JWT-based authentication with HTTP-only cookies, bcryptjs password hashing, and a session/current-user endpoint to enforce role-based access control.
- Modeled the data layer with Prisma ORM over SQLite and built REST API routes to handle listings, favorites, and authentication.

Event Management System (MERN Stack) | *React, Node.js, Express.js, MongoDB*

- Developed a full-stack event management platform enabling users to discover, join, and track events through a personalized dashboard.
- Engineered RESTful backend services with Node.js and Express, and designed MongoDB schemas to support CRUD operations on event and user data.
- Implemented authentication and event-history tracking, integrating frontend and backend for a seamless user experience.

NoteTube – Video Notes & Summarization Platform | *React, Flask, MongoDB, JWT, bcrypt, REST API*

- Built a full-stack web application that retrieves video transcripts and generates automated notes/summaries, using React for the frontend and a Flask/Python backend.
- Designed REST API endpoints connecting the frontend to backend services for transcript retrieval and note generation, and implemented JWT/bcrypt-based user authentication.
- Integrated MongoDB for persistent storage of user and application data, and configured environment variables for a modular, maintainable architecture.

Decoding Academic Success – Sleep Pattern Research | *Python, Pandas, Scikit-learn, Matplotlib*

- Conducted an academic research project analyzing student survey data to study the relationship between sleep patterns and academic performance.
- Performed data cleaning, preprocessing, exploratory data analysis, and feature engineering, then applied machine learning models with feature-importance analysis and evaluation.
- Visualized findings using Matplotlib to communicate key patterns and support the analysis conclusions.

EDUCATION

Master of Computer Applications (MCA) — Jain University, Bengaluru	2025 – 2027
Bachelor of Computer Applications (BCA) — Presidency College, Bengaluru	2022 – 2025
